We Can Name

Parts of a Plant

- leaf
- stem
- fruit
- roots
How to Use
“Parts of a Plant” Mini Poster

Display the poster. Tell students that the poster shows several parts of a strawberry plant. Point out each labeled part and name it. Explain the main functions of the plant parts:

• A fruit gives seeds a covering.
• A leaf captures light to make food for the plant.
• A stem supports a plant and takes water from the roots to other parts of the plant.
• The roots take in water.

Refer to the poster periodically throughout your Tower Garden® growing process. Encourage students to use the correct plant part names as they describe their observations.
