Our Tower Garden®

Today’s date is ________________________________________________.

I observed a __________________________________________________ plant.

This is what it looks like.

The plant has _________________________________________________

___________________________________________________________________________
___________________________________________________________________________
___________________________________________________________________________

Word List

- wide
- narrow
- smooth
- bumpy
- jagged
- curly
Copy the journal page for students. Have each student write the date and the name of a plant growing in Tower Garden®. Ask the student to observe the plant closely and draw it. Then have the student refer to the word list as he or she writes a description of the plant. Instruct the student to store the completed paper in a folder. Repeat the activity throughout the growing cycle. Later, bind each student’s journal pages to create a garden observation log.
